- **First accredited** infusion network in Canada

| PSP DATA INSIGHTS (PATIENT PULSE)

Data collected through a PSP can be turned into actionable intelligence supporting patients

Baseline patient demographics

- Analyze patient segments, including switch and treatment-naïve patients

Oversee the patient reimbursement journey, from enrollment to drug coverage

- Identify reasons for discontinuation

Assess and monitor patient treatment patterns

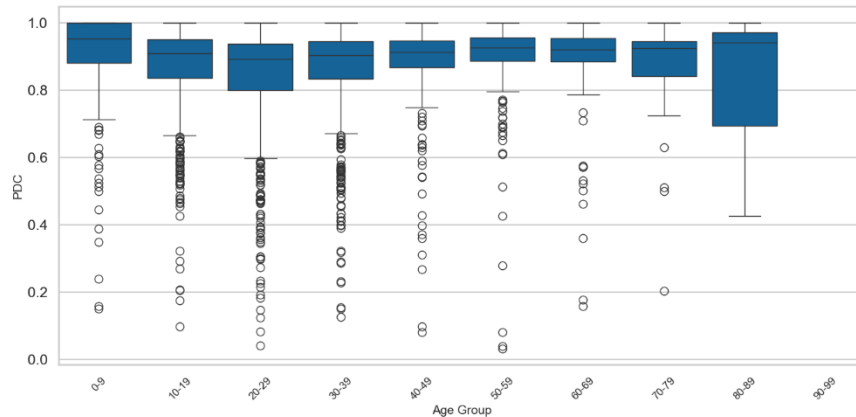

Optimize program efficiency through data-driven insights

Enhance support and program performance

CASE OF OUR PSP DATA ANALYTICS IN ACTION: IMPROVING ADHERENCE

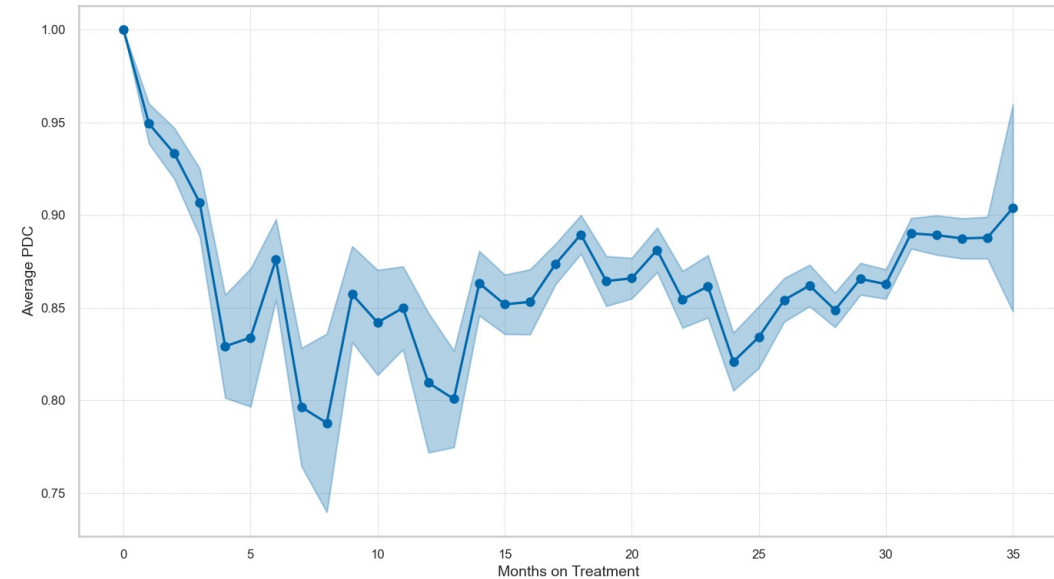

The Specialty Health team analyzed program data to generate insights about adherence trends. They designed a proactive intervention to address adherence-related barriers and improved clinical outcomes for patients.

Age vs. Treatment adherence

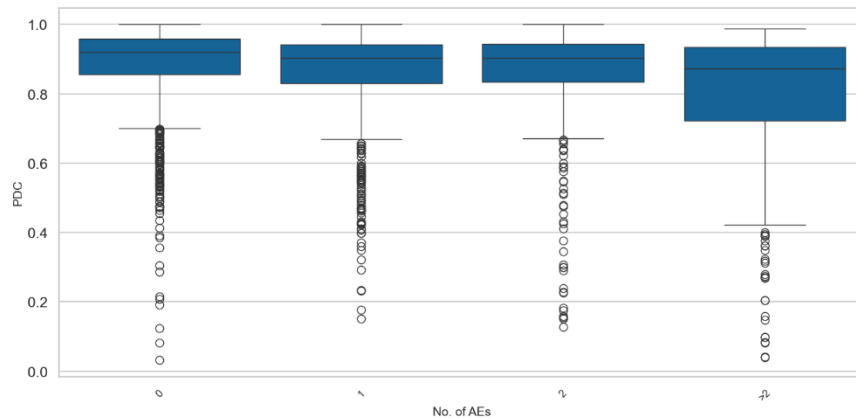

Time in treatment vs. Treatment adherence

Treatment adherence ↑

No. of experienced adverse events vs. Treatment adherence

Actionable insights and potential intervention points

- By Age group
- By number of experienced adverse events
- By time in treatment

THANK YOU
